

October 2018

Dear Faculty Sponsor:

Thank you for your interest in identifying and nominating students from your campus for the NASA Jet Propulsion Laboratory (JPL) Student Independent Research Internship (SIRI) Program! To be eligible for SIRI, students must meet the following requirements:

- STEM major
- Must not have already earned an advanced degree in a STEM field (master's, doctorate, professional degree)
- Cumulative GPA of 3.0+ (This MUST be confirmed by the faculty sponsor before forwarding resumes to JPL).
- Age of 18+
- US citizen or Permanent Resident (This MUST be confirmed by the faculty sponsor before forwarding resumes to JPL).
- Currently enrolled in a community college that is a SIRI partner campus
- Must be able to earn independent study credit for the SIRI experience at the college
- Able to intern for 10-15 hours per week on the JPL premises (no off-lab/online activities)
- Commit for 15 week internship period
- Must be willing to participate in monthly intern workshops at JPL, and prepare progress plans, reports, and final presentation

Please note the following:

- SIRI is an **unpaid** internship experience, and students will **not** receive compensation for travel to and from JPL.
- **Interns/Post-docs are no longer issued individual parking permits at JPL.** Students with disabled placards will be accommodated. All other students should inquire with the SIRI Coordinator regarding buses to JPL, carpool/vanpool options, etc.
- Students must remain enrolled in their independent study credit hours for the term of the internship.
- Students may only participate in SIRI for one quarter or semester.
- Spring 2019 internships run for 15 weeks, and will start in January or February 2019.

#### INSTRUCTIONS FOR FACULTY SPONSORS

1. Please provide interested students with a copy of the Spring 2019 "Announcements of Opportunity." Students should read these announcements very carefully to determine

which projects are best aligned with their research interests, skills, and academic background. Students are permitted to apply for a maximum of TWO (2) opportunities.

2. Each student should provide you with a separate electronic resume for each opportunity and ONE electronic copy of their unofficial transcript. The resumes and transcript should be separate. The resumes and transcripts should be saved with filenames that contain the student's first and last name, and the AO number (i.e. "First\_Last\_AO1234") The AO number can be found at the very top of each announcement of opportunity. Your campus is free to set an "internal deadline" for the submission of resumes to faculty so you may vet them before forwarding to JPL.
3. Faculty Sponsors should nominate students who meet all eligibility criteria and have research interests, skills, and academic criteria that closely match the preferred qualifications listed in the announcements of opportunity.

**Please only nominate students if you currently have a mechanism on your campus for awarding units/credits for independent study or internships. A student may not intern under SIRI without being concurrently enrolled in units/credits for their efforts.**

Sponsors may nominate multiple students for the same opportunity. **To nominate a student, please forward resume(s) and unofficial transcript to [Roslyn.Soto@jpl.nasa.gov](mailto:Roslyn.Soto@jpl.nasa.gov) by close of business on November 26, 2018.**

Students are selected for internships by JPL scientists and engineers. Please note that this is a competitive process, and meeting the eligibility requirements for SIRI does not guarantee an internship offer. Offers will be made via email to students beginning the week of December 10, 2018, and will continue to be sent out until all opportunities are filled. Sponsors will be notified via email when an offer is made. Please note that a student may be offered an internship that he/she did not initially apply to, at the discretion of JPL. Students who receive multiple internship offers will receive information on all projects and given an opportunity to select their preferred opportunity.

If you have questions or concerns about the SIRI program, please feel free to contact me via email or telephone. Thank you for your support of student research experiences!

Sincerely,

Roslyn Soto  
SIRI Program
